## Project 1

Enter your name and EID here

This project is due on the deadline posted on edX. Please submit as a pdf file.

**Part 1:** Demonstrate basic command of Markdown by creating a bulleted list with three items, a numbered list with three items, and a sentence that has one word in bold and one word in italics.

- Item 1
- Item 2
- Item 3

## **Things**

- 1. Thing 1
- 2. Thing 2
- 3. Thing 3

Quick brown fox jumps over the lazy dog.

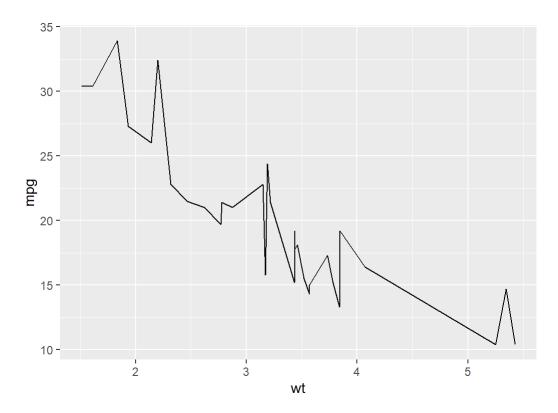

Part 2: The mtcars dataset contains information on car design and performance in 1974:

mtcars

```
mpg cyl disp hp drat

                                                                     5
                                                                          8
## Volvo 142E
                              4 121.0 109 4.11 2.780 18.60 1 1
                       21.4
                                                                     4
                                                                          2
```

Use ggplot to make a line plot of the weight of a car (column wt ) versus its fuel economy, measured in miles/gallon (column mpg ).

```
ggplot(mtcars, aes(wt, mpg)) + geom_line()
```

Now make a scatter plot (using  $geom\_point()$ ) of the weight of the car versus its horse power ( hp ), and color points by its fuel economy.
